

TOOL 8 | Factors of Involuntary Immobility

| | | | |
|----------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------|------------|
| Learning Objective | Understand Factors of Involuntary Immobility and how to mitigate them | | |
| Learning Outcome | After use of the tool, participants will <ul style="list-style-type: none">▶ understand:<ul style="list-style-type: none">▶ the factors of involuntary immobility▶ connections between the factors▶ understand mitigation options▶ be able to:<ul style="list-style-type: none">▶ develop mitigation policies/action/activities for each factor of involuntary immobility | | |
| Target Group | All | | |
| Type |   | Duration | 90 minutes |
| Use |   | Participants | 12-25 |
| Complexity | Medium | | |
| Material Needed |  | <ul style="list-style-type: none">▶ Flipcharts per group (5) and markers▶ Group working rooms | |
| |  | <ul style="list-style-type: none">▶ Breakout rooms (5)▶ Whiteboard per group | |
| Preparation Steps | Prepare a flipchart / whiteboard per group on the factors (economic, health, social, political, geographic) | | |
| Implementation Steps | <ul style="list-style-type: none">▶ Build 5 groups (one per factor)▶ Ask groups to<ul style="list-style-type: none">▶ define “their” factor (incl. boundaries and in relation to the other factors)▶ explain, why the factor might be important (a reason to migrate) to a sample population or person, or family (to be chose by the working group) and why possibly not▶ define impacts of the factor on that population (why are they “trapped”)▶ define possible mitigation and adaptation actions/policies▶ Let groups present▶ After the presentation, ask groups to mark those mitigation and adaptation actions that seem to be realistic, could be implemented, and ask “why” these could be realised and others could not | | |
