

MODULE 1 | Introduction to Human Mobility in the Context of Climate Change

| | | | |
|----------------------|---|--------------|---------------|
| Learning Objective | The module aims at introducing participants to the state of the art of human mobility in the context of climate change (HMCCC). This includes a short introduction to the impacts of climate change as well as key definitions and concepts of human mobility. The module introduces four forms of climate change related human mobility and immobility: migration, displacement, planned relocation and trapped populations. | | |
| Learning Outcome | <p>After use of the tool, participants will</p> <ul style="list-style-type: none"> ▶ understand: <ul style="list-style-type: none"> ▶ that all forms of HMCCC are multi-causal, highly dependent on the context and differ within the levels of voluntariness, autonomy. ▶ be able to: <ul style="list-style-type: none"> ▶ define climate change and differentiate slow-onset processes and sudden-onset events ▶ determine how risks of climate change impacts depend on hazards, exposure, and vulnerability ▶ distinguish different types of HMCCC ▶ explain how climate change influences human mobility as one of multiple factors ▶ categorise types of human mobility along the axes of voluntary-forced, temporary-permanent, internal-cross-border ▶ identify why the impact of climate change on human mobility differs for each individual | | |
| Target Group | All | | |
| Type |  | Duration | 30-40 minutes |
